

SACHIN JAMES

Python Django Full Stack Developer

+918921207450 | sachinjamestr@gmail.com | Thrissur , Kerala, India | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Python Django Full Stack Developer with experience building a multi-role service booking platform featuring User, Admin, and Employee portals with role-based authentication, RESTful APIs, service CRUD, booking lifecycle management, and real-time status tracking. Proficient in Python, Django, Django REST Framework, PostgreSQL, HTML, CSS, JavaScript, and Git. Adept at architecting end-to-end Django MVT applications with clean, maintainable code.

Skills

Languages : Python
Frameworks : Django, Django REST Framework
Frontend : HTML, CSS
Database : SQLite3, PostgreSQL
Tools : Git, GitHub
Concepts : REST API, OOP, MVT, CRUD, JWT Authentication

Project

Clean Freshly — Service Booking Website

Technologies - Django, Python, SQLite3, HTML, CSS, JavaScript, Bootstrap

- Built a full-stack multi-role service booking web application using Django MVT architecture, Python, SQLite3, and Bootstrap with responsive design across all devices
- Implemented dynamic service pages, user authentication, and role-based access control for User, Admin, and Employee portals using Django views, templates, and models
- Integrated a functional contact form, review system, and customized Django admin panel for complete service and data management

Education

- Bachelor of Computer science - Calicut University. 2016-2019
- Higher Secondary Education - St. Thomas HSS, Thope, Thrissur. (63%)
- SSLC - J P E H S, Koorkenchery. 2014 (82%)

Internship & Training

Python Django Full Stack Training – Avodha Edutech Pvt Ltd (Ongoing)

Soften Technologies · Kadavanthra, Cochin Aug 2023 – Jul 2024 (1 year)

Python Full Stack Development Training Aug 2023 – Jan 2024

Junior Software Developer (Internship) Feb 2024 – Jul 2024

- Developed and deployed dynamic web applications using Python and Django, handling backend functionality, database management, and frontend user experience.
- Managed SQLite databases to efficiently store, retrieve, and maintain data integrity across multiple application modules.
- Optimized application performance through targeted improvements in Django views, ORM queries, and database indexing.
